

**WHAT PEOPLE
ARE SAYING
ABOUT WIPER SHAKER™**

“We have found the Wiper Shaker™ a good fit with our salt plow trucks. The operators find it very helpful to clear the snow and slush off the windshield without having to stop and get out to crawl over the hood to clear the wipers by hand. **By staying inside the cab this decreases the chance of an incident occurring, i.e., other vehicles hitting our parked trucks or the operators, in poor visibility.** It also increases response time to snow and ice control by not having to stop.”

Doug Peveril
Fleet Service Coordinator for Nova Scotia Department of Transportation & Public Works, Western District

“I am very satisfied with the performance of the Shaker™. **In stormy weather, I do not have to pull over, when I can't safely do so.** The Wiper Shaker™ keeps me on the road with better sustained vision, without intervention on my part to clean wiper ice build up.”

Guy Fortin,
Driver for Erb Transport
Trenton, Ontario

**THE MOST EFFECTIVE WAY
TO KEEP YOUR WIPER BLADE
FREE OF WINTER DEBRIS.**

**SIMPLY MAKES
YOUR BLADE MORE
EFFECTIVE**

**Don't Gamble
with Your Vision
While Driving...**

**DID
YOU
KNOW?**

According to the American
Optometric Association, 90% of all driving
decisions are based solely on visual clues.

THE SHAKER™ SIMPLY MAKES YOUR BLADE MORE EFFECTIVE.

Protected under the following U.S. patents:
5,867,858 and 6,129,093
Canadian Patent: 2,199,240 and 2,245,298
European patent: 1077842

**Get the SHAKER™
working for you!**

**Vibrates your wiper to remove
trapped leaves, snow, sleet
and freezing rain.**

Safe driving in bad weather conditions is no joke.

Let's face it – if you can't see clearly out of your windshield, it becomes a MAJOR SAFETY issue. The Wiper SHAKER™ improves blade performance in the worst of conditions.

- Vibrations dislodge debris, including leaves, twigs and pine needles in mere seconds!
- Deals with Conformance and A-Pillar build-up problems at the early stage
- Frees up initial freezing rain or car wash run off
- Requires approximately one ampere to operate, and only while unit is vibrating
- Activated from inside the vehicle at the push of a button
- Sealed system allowing functionality in any winter environment (e.g., snow, freezing rain, hail)
- Makes much more efficient use of washer fluid
- Clamps onto to any type of existing wiper arm that uses a hook wiper arm and has appropriate clearance
- Environmentally friendly, does not require any consumables
- Portable when using the cigarette lighter version, should you decide to sell your vehicle
- Manufactured under ISO 9000 guidelines and uses only high quality components to ensure reliable usage

The Shaker™ device is approximately 1" in diameter.

HOW DOES IT WORK?

- 1 This compact unit clamps securely to the existing wiper arm, without blocking the driver's vision.
- 2 The driver presses a button to activate a specially designed weight that spins inside the SHAKER™, and that creates the high output vibration.
- 3 The vibration causes the wiper blade to skip against the windshield – shattering frozen snow and displacing ice.

Snow build-up under wiper causes streaking.

The SHAKER vibrates your wiper, removing snow build-up.

The SHAKER improves visibility.
